

CAST IRON Y STRAINER FLANGED PN 10/16

PRODUCT EVOLUTION

Be careful, our strainers Ref.220 are changing

**We currently have 2 different types available (according to DN)
with different dimensions, screen and gaskets:**

Old type:

New type:

At the end, only the new type will be available (from page 2 to 9)

CAST IRON Y STRAINER FLANGED PN 10/16

NEW

Certificate 3.1

Size : DN 15 to DN 600
Ends : Flanges PN10/16 R.F.
Min Temperature : - 10°C
Max Temperature : + 120°C
Max Pressure : 16 Bars up to DN 200 (10 bars over)
Specifications : Removable stainless steel filter
Bolted bonnet with draining cap

Materials : Ductile iron body EN GJS-450-10 (DN50-300)

CAST IRON Y STRAINER FLANGED PN 10/16

SPECIFICATIONS :

- Removable stainless steel filter
- R.F. flanges PN10/16
- Horizontal or vertical position with descendant fluid (respect the flow direction indicated by the arrow)
- Mesh : see tab page 4
- Bolted bonnet with draining cap threaded BSP
- Epoxy painting color grey RAL 7011, 70 µm thickness

USE :

- For water distribution, watering, irrigation
- Min Temperature Ts : - 10°C
- Max Temperature Ts :+ 120°C
- Max Pressure Ps : 16 bars up to DN200 , 10 bars over

HEAD LOSS GRAPH :

CAST IRON Y STRAINER FLANGED PN 10/16
RANGE :

- R.F. flanges PN10/16 from DN 15 to 300, PN10 over

MATERIALS :

Item	Designation	Materials from DN15 to 40 and from DN350 to 600	Materials from DN50 to DN300
1	Body	Cast iron EN GJL-250	Ductile iron EN GJS-450-10
2	Screen	AISI 304	AISI 304
3	Bonnet	Cast iron EN GJL-250	Ductile iron EN GJS-450-10
4	Bonnet gasket	Graphite	Graphite
5	Draining cap	Brass	Brass
6	Bonnet screw	Steel Rst 37-2	Steel Q235

CAST IRON Y STRAINER FLANGED PN 10/16

STANDARDS :

- Fabrication according to ISO 9001 : 2015
- DIRECTIVE 2014/68/EU : Product excluded from directive (Article 4, § 3)
- Certificate 3.1 on request
- Length according to EN 558 series 1 (DIN 3202-1 F1, NF 29354)
- R.F. flanges according to EN 1092-2 PN10/16

INSTALLATION POSITIONS :

Vertical position (descendand fluid)

Horizontal position

ADVICE : Our opinion and our advice are not guaranteed and SFERACO shall not be liable for the consequences of damages. The customer must check the right choice of the products with the real service conditions.

CAST IRON Y STRAINER FLANGED PN 10/16

INSTALLATION INSTRUCTIONS

GENERAL GUIDELINES :

- Ensure that the strainers to be used are appropriate for the conditions of the installation (type of fluid, pressure and temperature).
- Be sure to have enough valves to be able to isolate the sections of piping as well as the appropriate equipment for maintenance and repair.
- Ensure that the strainers to be installed are of correct strength to be able to support the capacity of their usage.
- **Installation of all circuits should ensure that their function can be automatically tested on a regular basis (at least two times a year).**

INSTALLATION INSTRUCTIONS :

- **Before installing the strainers, clean and remove any objects from the pipes** (in particular bits of sealing and metal) which could obstruct and block the strainers.
- **Ensure that both connecting pipes either side of the strainer (upstream and downstream) are aligned (if they're not, the strainer may not work correctly).**
- **Make sure that the two sections of the pipe (upstream and downstream) match, the strainer unit will not absorb any gaps. Any distortions in the pipes may affect the tightness of the connection, the working of the strainer and can even cause a rupture.** To be sure, place the kit in position to ensure the assembling will work.
- Make sure flanges are cleaned.
- **If sections of piping do not have their final support in place, they should be temporarily fixed. This is to avoid unnecessary strain on the strainer.**
- Tighten the bolts in cross.
- The pressurisation must be increased gradually.
- So that the maintenance operations could be easily done, place a stop valve before and after the strainer. Thereby, the strainer could be isolated. During this operation, ensure to have a new bonnet gasket to avoid a leakage during the restarting.
- **Fluids in the strainer must not contain solid objects (it could damaged the seat).**

CAST IRON Y STRAINER FLANGED PN 10/16

Certificate 3.1

Size : DN 15 to DN 600
Ends : Flanges R.F. PN10/16
Min Temperature : - 10°C
Max Temperature : + 120°C
Max Pressure : 16 Bars up to DN 200 (10 bars over)
Specifications : Removable stainless steel filter
Bolted bonnet with draining cap

Materials : Cast iron body EN GJL-250

CAST IRON Y STRAINER FLANGED PN 10/16

SPECIFICATIONS :

- Removable stainless steel filter
- R.F. flanges PN10/16
- Horizontal or vertical position with descendant fluid (respect the flow direction indicated by the arrow)
- Mesh 1.1mm from DN 15 to 125, 1.5 mm from DN 150 to 300, 3 mm from DN 350 to 400 and 5 mm from DN450 to 600
- Bolted bonnet with draining cap threaded BSP
- Epoxy painting RAL 7011 color, 150µm thickness

USE :

- For water, water treatment, irrigation
- Min Temperature Ts : - 10°C
- Max Temperature Ts :+ 120°C
- Max Pressure Ps : 16 bars at 120°C up to DN200 , 10 bars over
