

Butterfly Valve, Plastic

Construction

The GEMÜ D450, D451, D457 and D458 butterfly valves are available in nominal sizes DN 50 - 300. They are designed to provide the best possible flow rates and offer excellent corrosion protection. Butterfly discs which minimize pressure loss are available in various materials providing the optimal solution for most areas of use.

Features

- Max. operating pressure: 10 bar
- UV resistant
- Wafer bodies for various standards: ISO/DIN, ANSI/ASTM, British Standard, JIS
- New butterfly disc design ensures low torque
- The hand lever can be adjusted in 7 positions (in 15° steps) and is equipped with a safety lock to avoid undesired operation.

Exploded drawing

Technical data

Working medium

Liquid media which have no negative impact on the physical and chemical properties of the disc and seal material.

Ambient conditions

Max. permissible ambient temperature -20 to +60°C

Max. perm. temp. of working medium

0 to + 90°C (dependent on disc material)

Materials

Body	PP (GF)
Disc	PVC-U / PVC-C / PP-H
Seat (liner)	EPDM / FPM

Note

No water hammer permissible
